

Special Plastic Module for
semiconductor industry

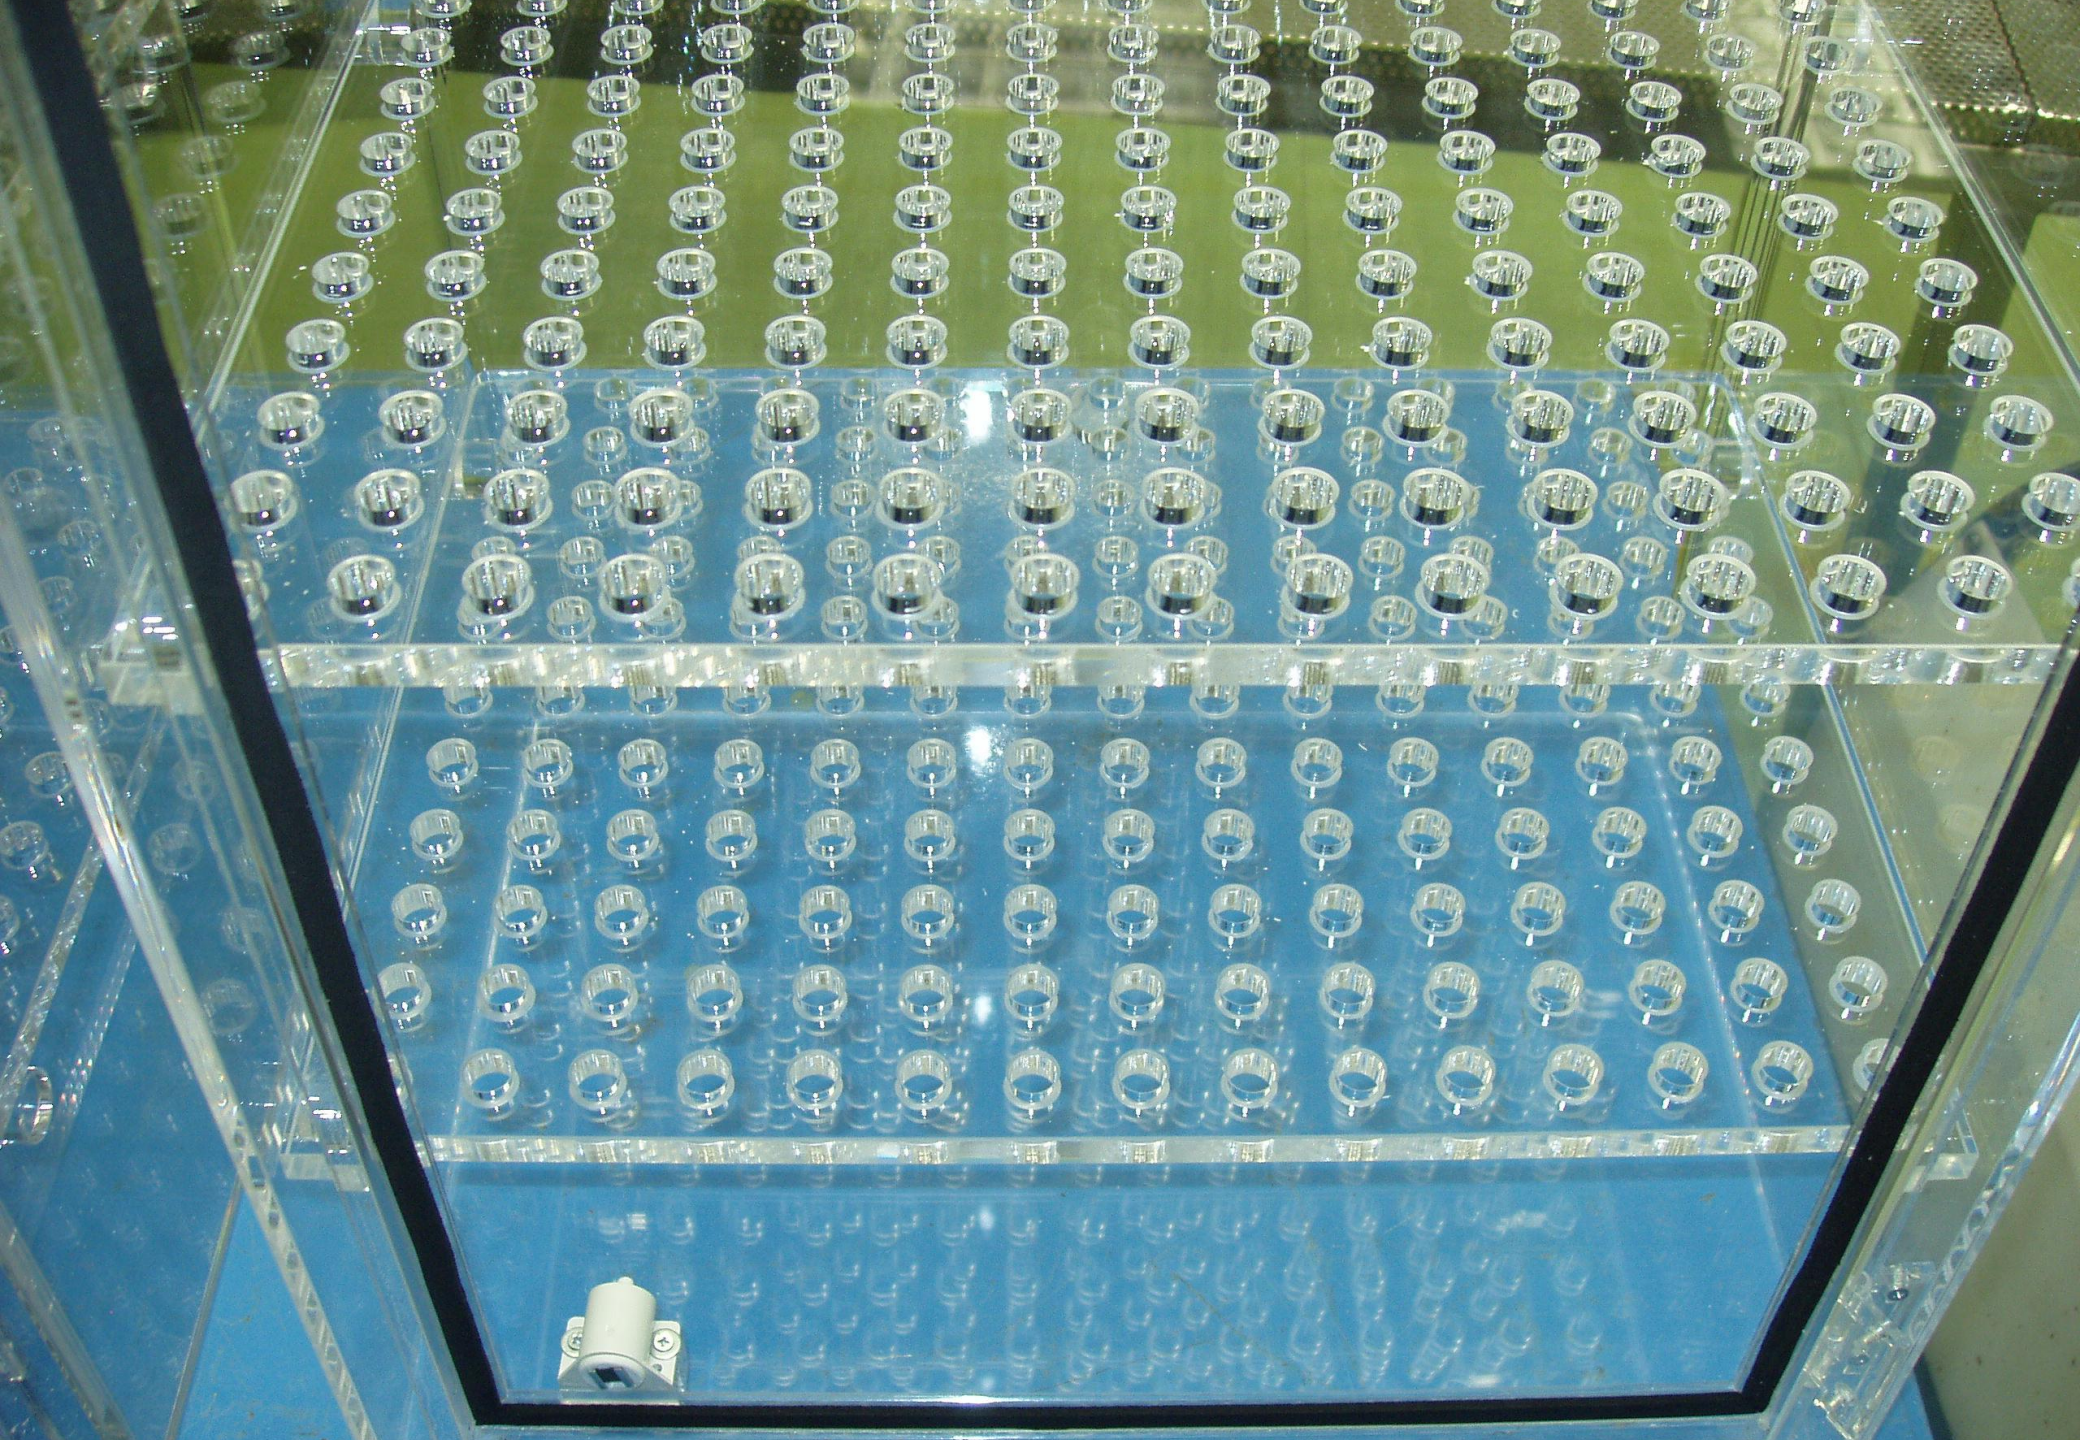

S.P.M. s.r.l.

Dry Boxes

SPM designs and realizes custom dry boxes modules. Different solutions can be adopted based on requirements and dimensioning. Normally we realized storages in transparent plastic material, optionally FM 4910 approved or stainless steel.

N2 controlled atmosphere, temperature controlled air, oxygen analyzer, and humidity control are just some of various option that we can provide on dry boxes we realize.
